Characteristics

1

How would you characterize the maturity and scale of your organization's Clinical Research portfolio?

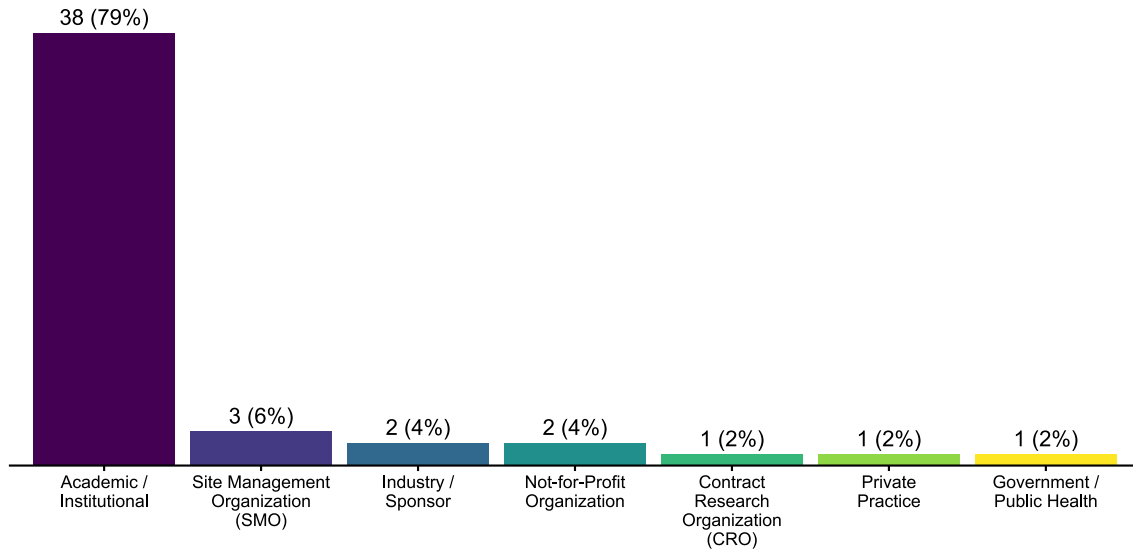

n = 48

2

Which of the following best describes your organization type?

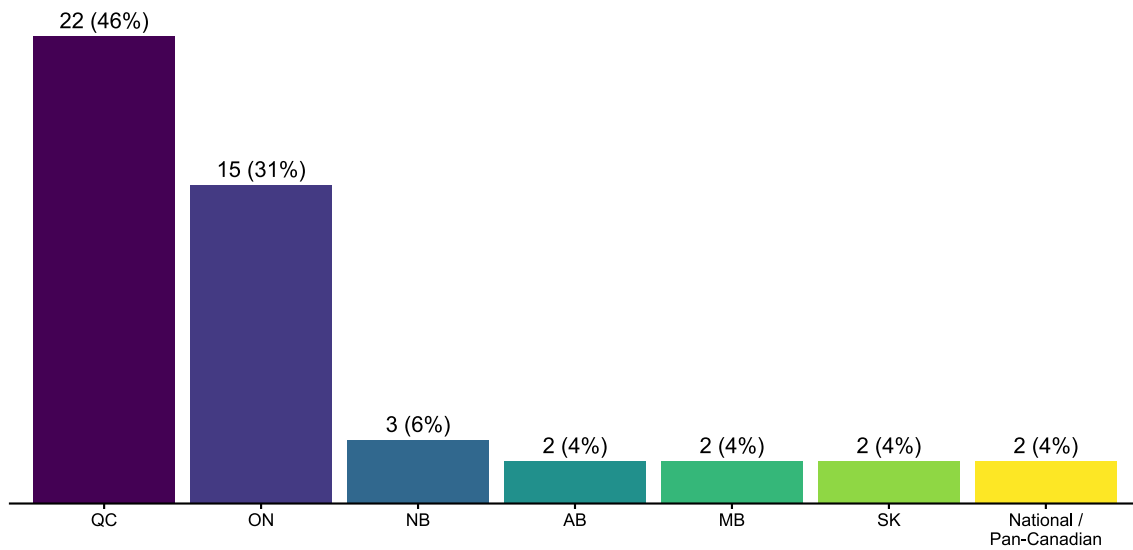

n = 48

3

Where in Canada does your organization conduct Clinical Research operations?

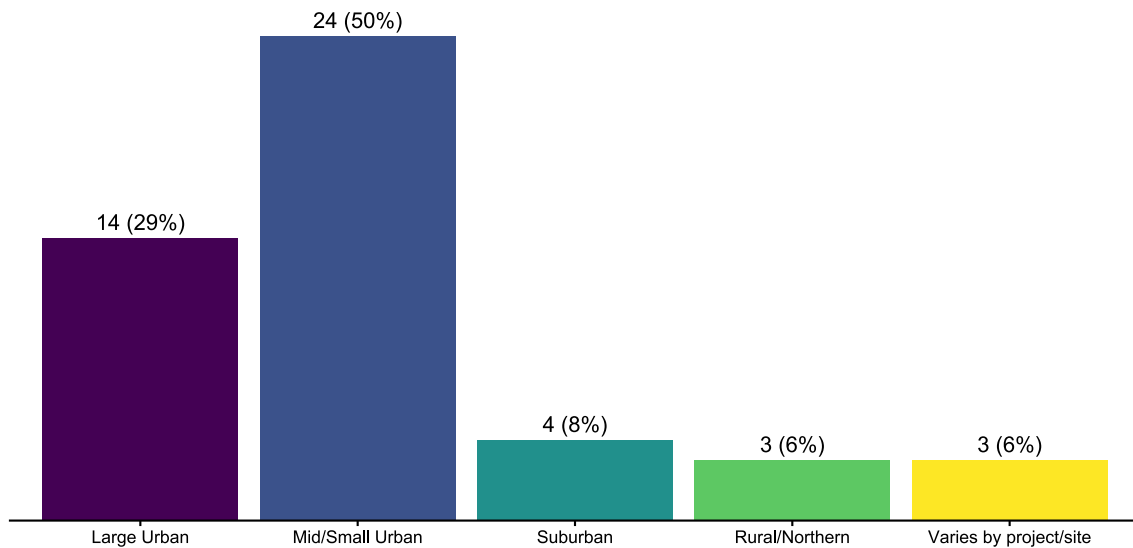

n = 48

4

How would you characterize the primary setting of your research site(s)?

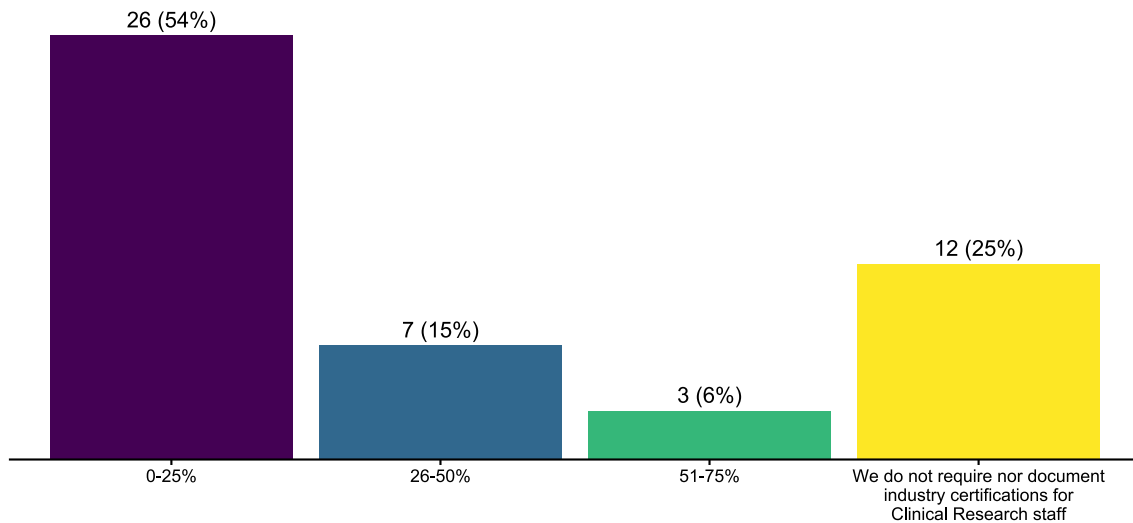

n = 48

5

Roughly what percentage of your current Clinical Research staff holds an active industry certification (e.g., SOCRA, ACRP, or equivalent)?

n = 48

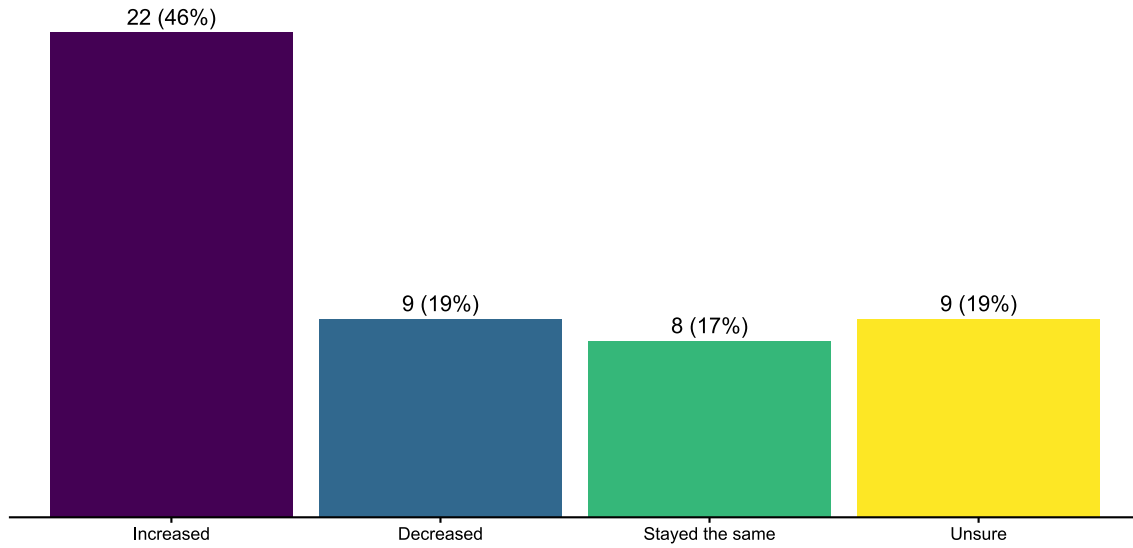

Trends

1

Have the number of applications increased or decreased over the past 3 years?

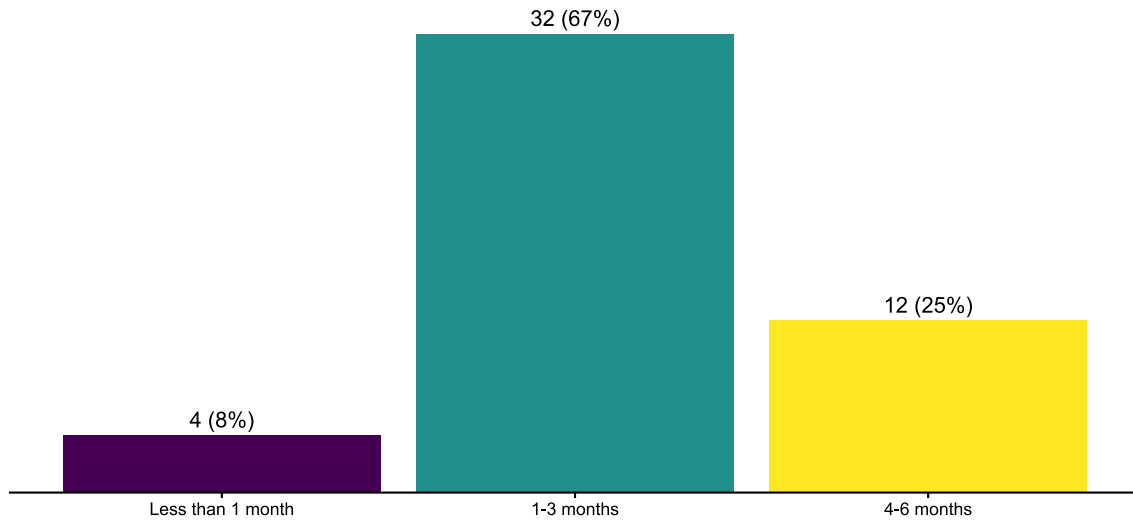

n = 48

2

Over the last 12 months, what has been the average duration to fill a vacant Clinical Research position, from the initial job posting to the signed offer letter?

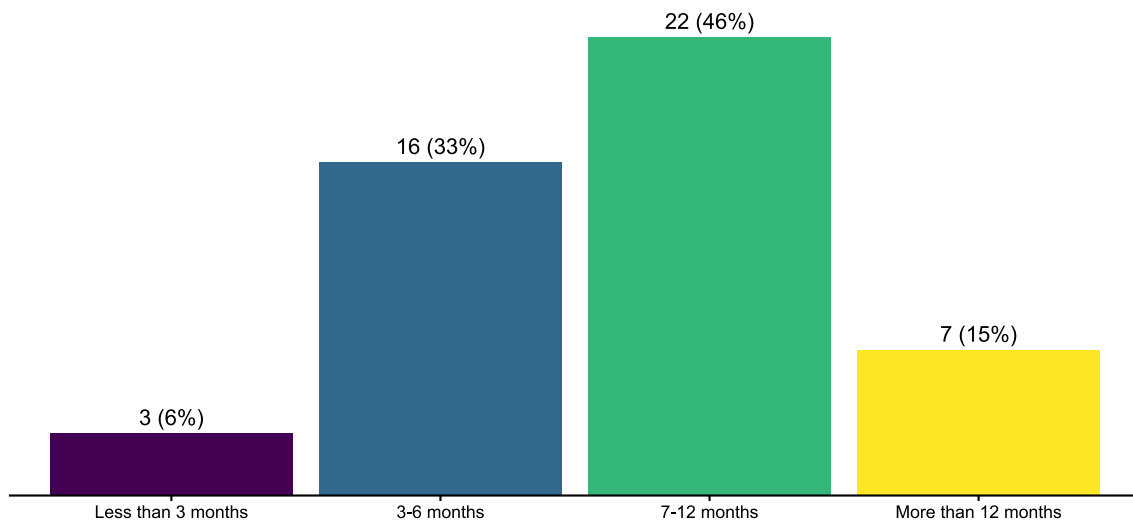

n = 48

3

On average, how many months does it take for a new hire to become fully independent and autonomous in their role?

n = 48

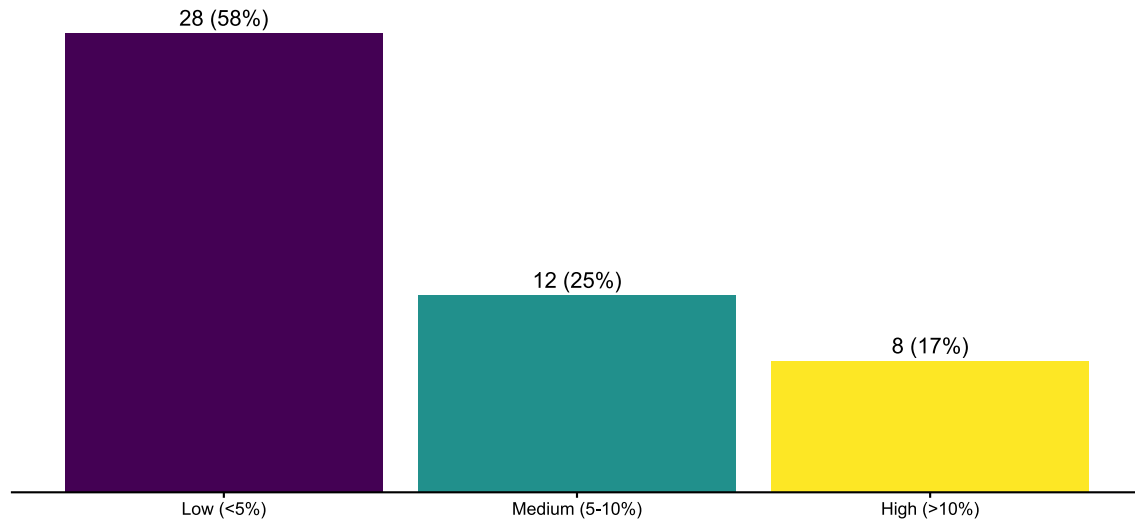

Turnover

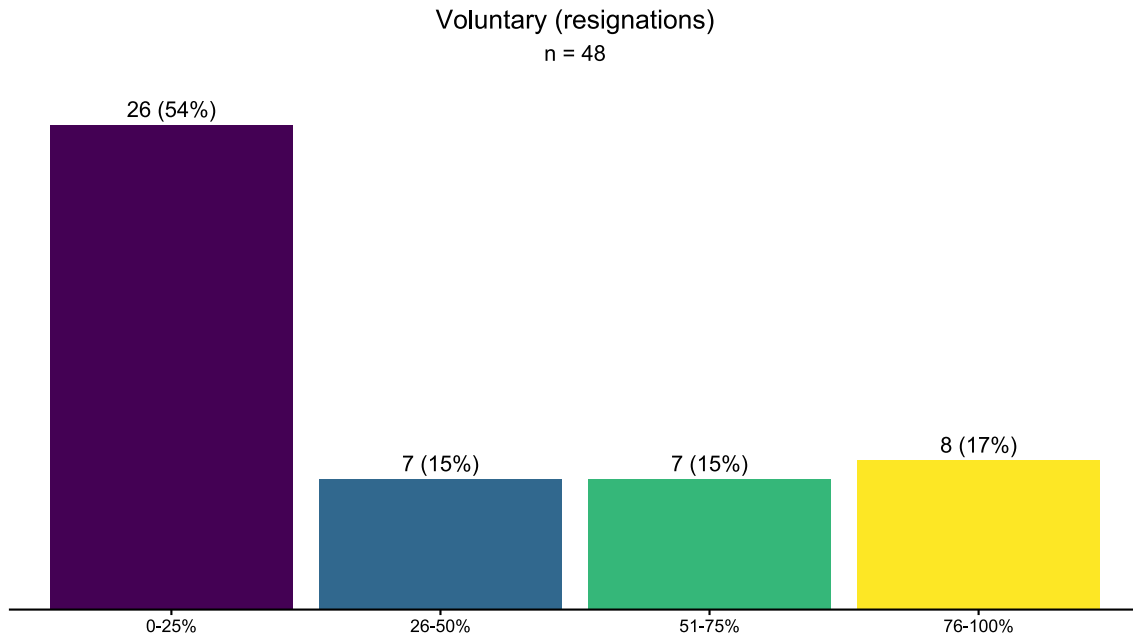

1

For the most recent 12-month reporting period, what was the total staff turnover rate for Clinical Research roles?

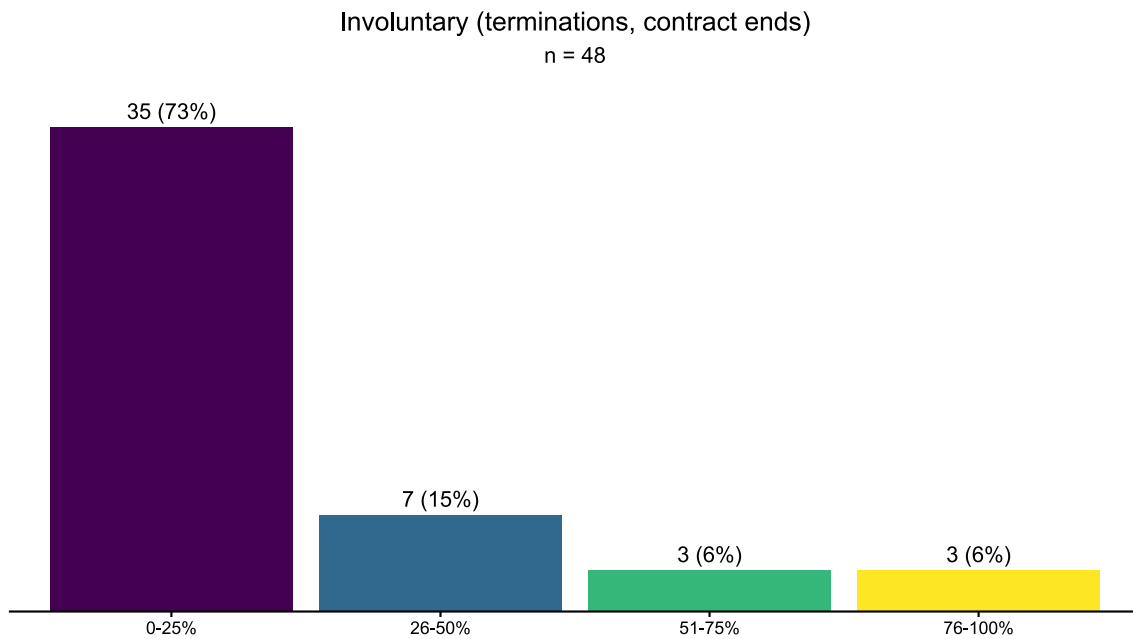

n = 48

2

3

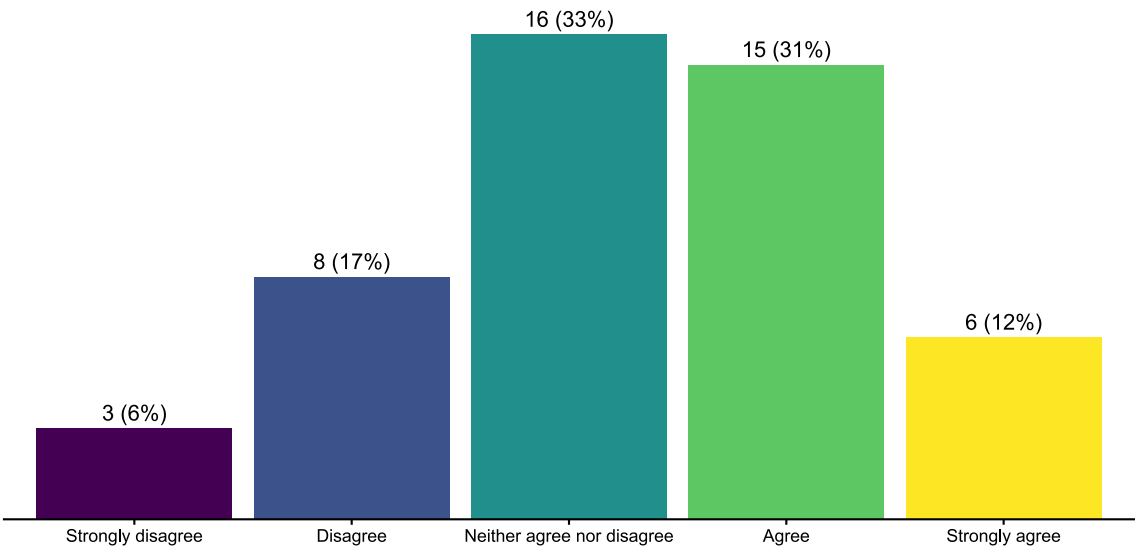

Perspectives

1

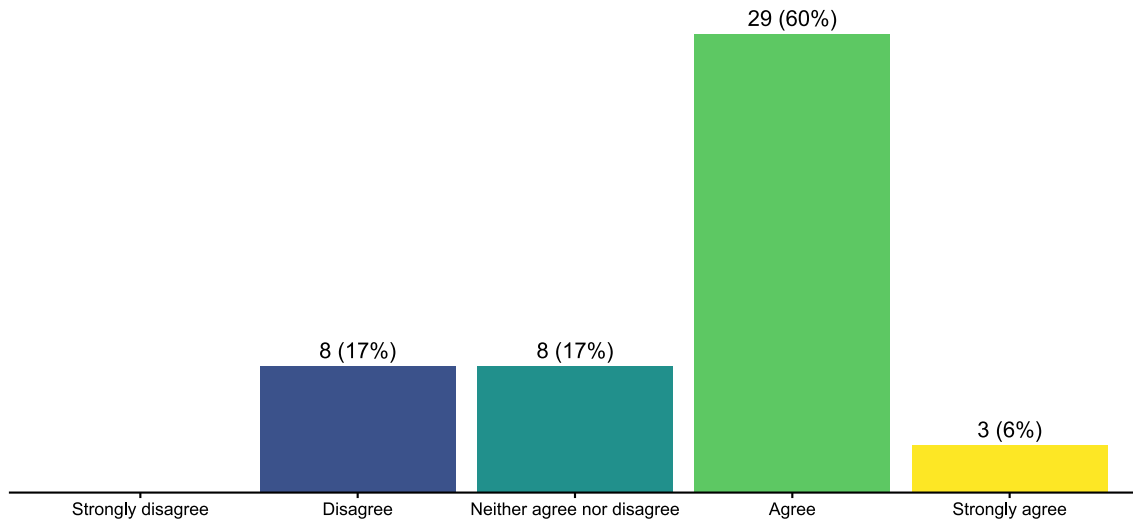

Current staffing levels limit the number of trials we can initiate or accept.

n = 48

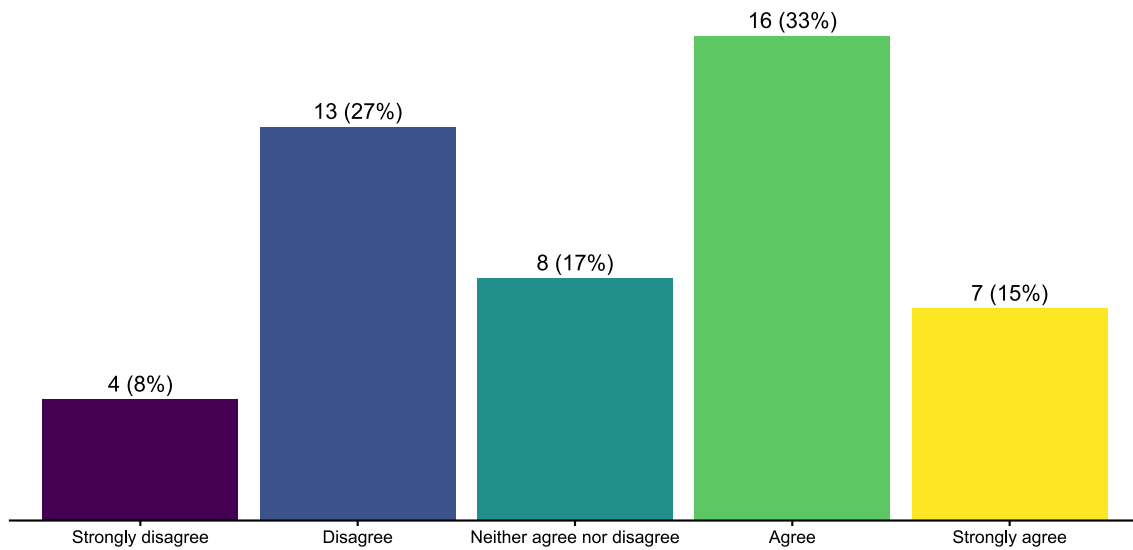

2

We are confident in our ability to meet
anticipated trial demand over the next 3 years.
n = 48

3

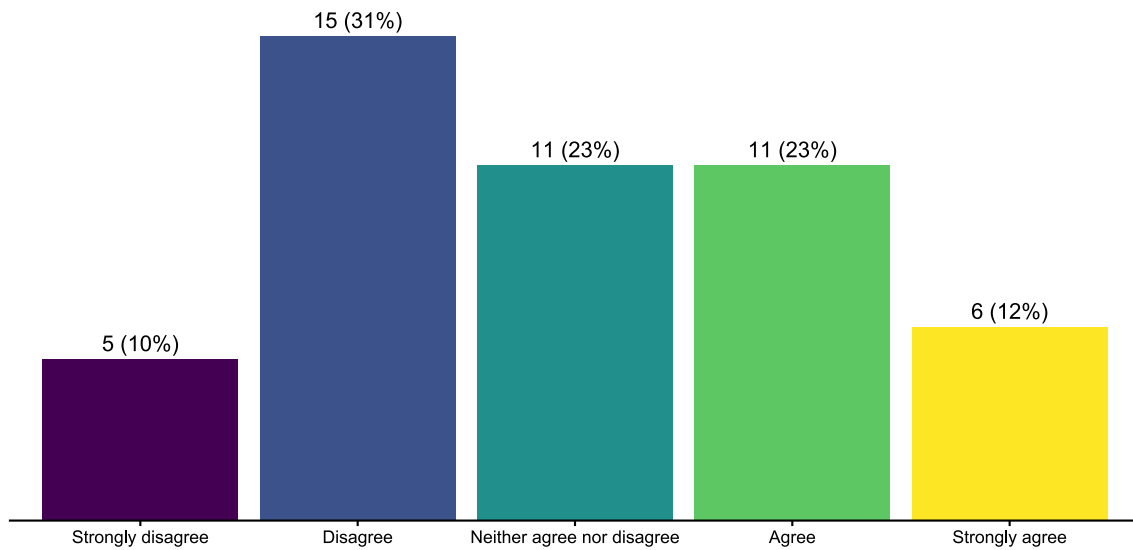

Staffing shortages have delayed trial start-up.
n = 48

4

Staffing shortages have resulted in missed trial opportunities.

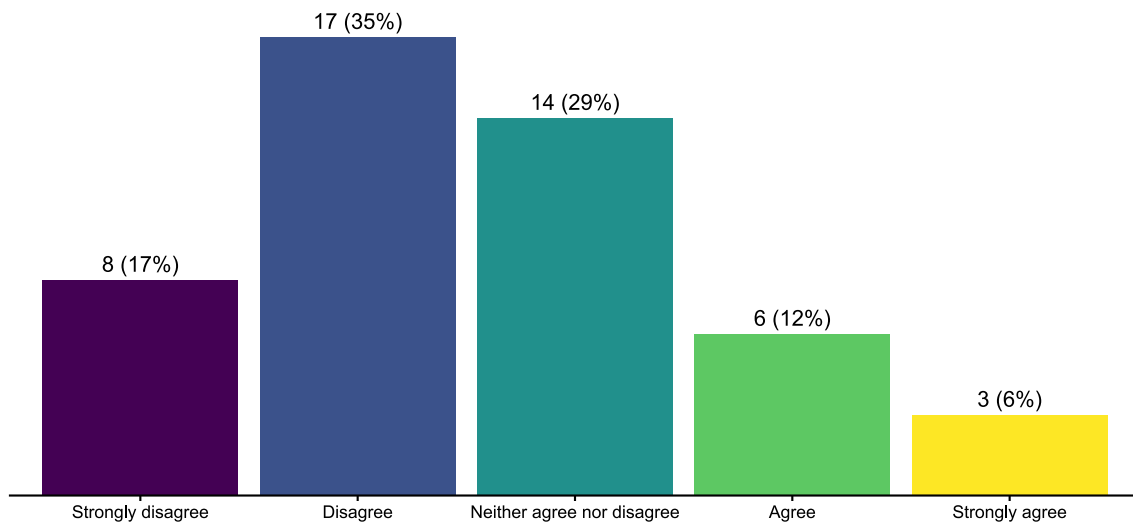

n = 48

5

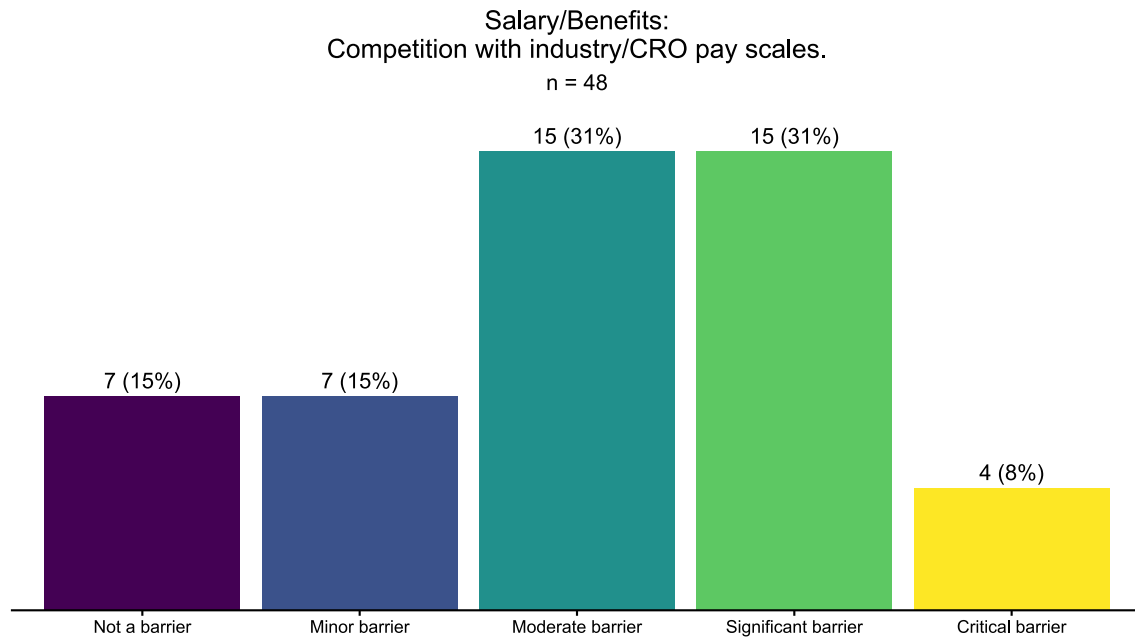

Our organization has a defined workforce or talent strategy for Clinical Research, and workforce planning is integrated into broader research infrastructure planning.

n = 48

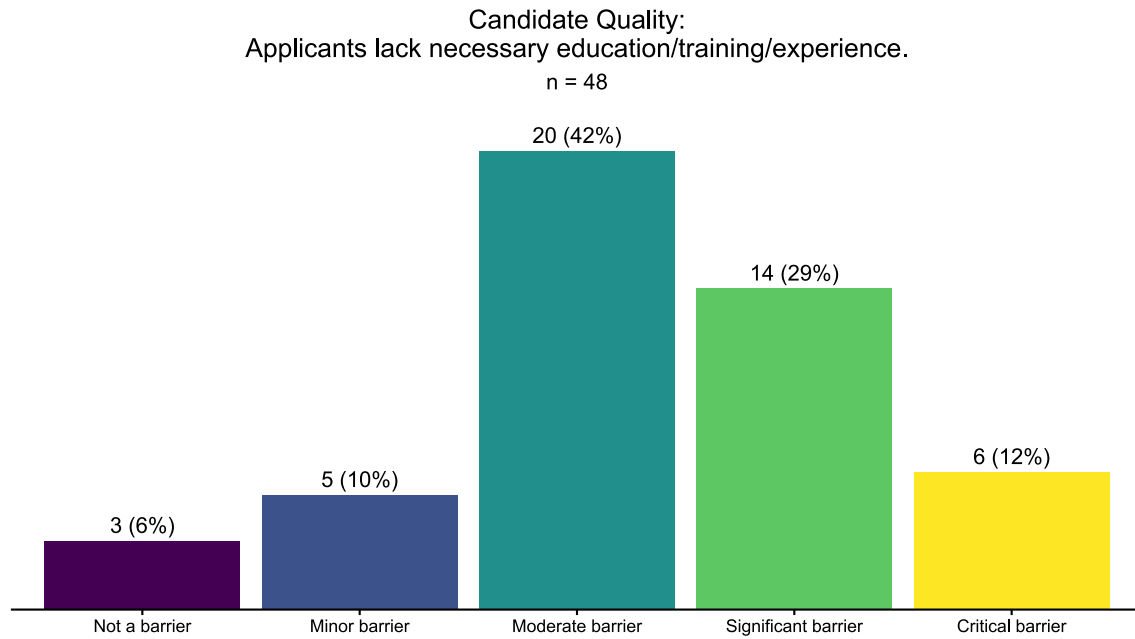

Barriers to recruiting qualified staff
